RECHARGING YOUR ë-C3, EASY TO HANDLE AT HOME

Recharging your electric vehicle at home is as easy as it gets. All you need is a cable and an electrical setup. The charging time varies depending on their features, ranging from faster to slower.

STANDARD

MODE 2 CABLE

Provides up to **1.8 kW** of power.

Plugs into a standard domestic power socket.

► Charges from **20 to 80%** in approximately **15 hours**.

SINGLE-PHASE

MODE 3 CABLE

Provides up to **7,4 kW** of power.

Connects to a 7,4 kW Wall box.

► Charges from **20 to 80%** in approximately **4h10min**.

REINFORCED

MODE 2 CABLE

Provides up to **3,7 kW** of power.

Connects to a reinforced domestic socket like Green Up, significantly improving charging times compared to a standard domestic power socket.

► Charges from **20 to 80%** in approximately **8h50min**.

THREE-PHASE

MODE 3 CABLE

Provides up to **22 kW** of power.

Connect to an 11 kW Wall box for faster charging. Your ë-C3 must be equipped with an onboard 11 kW charger. Charges from 0 to 100% in less than 6 hours.

► Charges from **20 to 80%** in approximately **2h50min**.

Installing a Wall box in a single-family home or in a multi-family residence is a great idea to optimize charging time. Plus, you can benefit from government assistance.

CHARGE UP AND CRUISE THE MILES

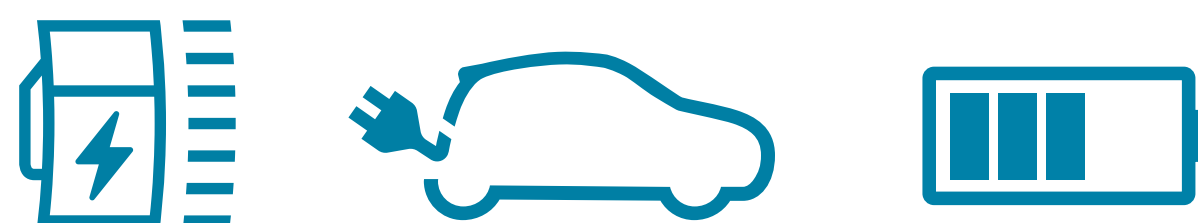

While on the move, whether in France or across Europe, you have access to a network of charging stations, ensuring every journey is as smooth as possible.

**FREE2
MOVE**

FREE2MOVE ESOLUTIONS: TO OPTIMIZE ALL YOUR JOURNEYS

With the eSolutions Charging app, you can easily and swiftly manage the recharging of your Citroën during your travels, thanks to the 300,000 charging points across France and Europe.

THE HIGHWAY SUPERCHARGERS NETWORK

The super-fast charging stations network along the highways is growing rapidly.

In just a few minutes, these 50 kW and above superchargers can top up your battery to 80%. Perfect for your spontaneous weekend getaways.
